Software Engineering Technology (Optional Co-Op)
Online:
2 Semesters For 3 Years, Completed 1 Semester
Average 4.0 Scale GPA (Approximation): 3.2
- Member of Engineering Club

PROFESSIONAL SUMMARY

Innovative and detail-oriented software developer with a portfolio of over 10 diverse projects, ranging from games to productivity tools. Passionate about game development, GUI design, and application programming, with standout works including Blobbymite: Hero of Power —a feature-rich 2D platformer developed over three years—alongside modern recreations of *Checkers* and *Space Invaders*, the organizational app *Timerist*, and the pixel art tool *Anipixer*. Proficient in frameworks like PyQt5, Pygame, and Django, and fluent in Python, C#, GDScript, JavaScript, and working knowledge of C++. My work emphasizes problem-solving, clean UX design, and technical depth. Beyond software, I volunteer at Morningstar Christian Fellowship, helping lead children's summer programs by organizing activities, resolving conflicts, and fostering a safe, inclusive environment. This role has strengthened my leadership, teamwork, and communication skills.
Always striving to grow, I bring a balance of creativity, discipline, and community spirit to everything I do.

SKILLS

- Friendly, positive attitude
- Customer service
- Communication
- Teamwork and collaboration
- Problem-solving
- Responsible and Routine oriented

EXPERIENCE

July 2024 - July 2024

Limited Working

- Released a game on Steam (largest PC game platform)
- Created over 50+ classes to represent different entities in my game using the Godot game engine with C# and GDScript.
- Encountered and Solved over 500 bugs when developing this project over the span of 3 years.
- Fixed bugs of various kinds including File Save/Load Errors, Physics API Glitches, Input Bugs, Filename on Different OS bugs, Unwanted Output Bugs.
- Created Webapps, Games, and GUI from scratch in C#, C++ and Python. Created 50 Different Game Mechanics, 12 Levels, Designed and Programmed a Fully Functional Level Editor With Support To Publish and View them in a Online Levels Server.
- Used every language feature in GDScript and Python
- Proficient with Java and C#
- Made simple projects in C++ and Raylib (low level but easy graphics AP/i)
- Created Webapps, Games, and GUI from scratch in Python
- Worked and Collaborated with my sister and other artists on Fiverr.

VOLUNTEER WORK

- Assisted with special events and programs.
- Maintained clean, neat, and operational facilities to serve program needs.

INTERESTS

Calisthenics, 2km walks, Weights, Basketball, Video Games, Movies

PROJECTS

Blobseer is an upcoming commercial game which I developed since 2022 with the help of my sister for Art. I did all the programming, game design, voice acting, story building, social media posting and marketing for the game. I encountered lots of setbacks and bugs when trying to achieve this but I never gave up and used all the resources and knowledge I learned from 2 past failed commercial apps to do this project.

EXTRACURRICULAR ACTIVITIES

Basketball, Mental Health and Wellness, Arts
